DME-Asg1

This is a site to allow users to keep track of activities they would like to remember.

Design Process

The site was made with everyone in mind, making sure that it is as easy to use as possible. I also wanted the design to be as clean and simple as possible. It is for people who want to document their everyday lives in a quick and simple fashion and using the site will be very intuitive.

User Stories

- As a user of the site, i want to make an entry about what happened today, so i can remember what happened today in the future.
